Come and join our network

SPACE is a network for business, communication and tourism programmes – for lecturers and professors interested in mobility and professional development, and for international office staff and management staff seeking inspiration and enthusiasm.

A network for **business,**
communication
and tourism studies

Knowledge sharing and peer reviews

The Annual Conference is organized as a peer-reviewed research forum where academics and researchers from SPACE member-institutions present their research work or examples of good practice in a number of areas related to innovation and applied research in education. Papers are published in the conference proceedings, and SPACE has its own Journal of Advances in Higher Education.

Experience a friendly atmosphere

SPACE is a friendly network of some 80 universities – your institution can join at a reasonable price and have access to our digital platform. Only a small registration fee is to be paid by members for the Annual SPACE Conference and Autumn Meeting.

Enhance your mobility

SPACE offers a platform for work placement opportunities to students at SPACE member institutions. Moreover, the work placement period abroad is mentioned on the SPACE diplomas and certificates, thus providing that “extra dimension” they need towards potential employers. Special internships are offered for the Hospitality and Tourism Management SPACE students by our partners outside Europe in the USA in cooperation with Walt Disneyworld in Lake Buena Vista and with local hotel chains.

The SPACE network is open and inviting

Thanks to our agreements of cooperation with other networks, SPACE members can benefit from a larger platform of partners and networking opportunities and are invited to participate in projects. Companies are involved in most of what we do and contribute a hands-on applied characteristic to SPACE activities.

Unique pan-European diploma offers

The European diplomas or certificates with the quality SPACE label are free and entirely sponsored by the association (validation is set by a special LEC - Level Evaluation Committee - organized by SPACE). No fee is charged for the use of our electronic digital platform - including all online courses and forums.

Easy networking

SPACE members receive the SPACE Newsletter for free (6 times a year). This Newsletter contains the latest news about the network, projects, upcoming events, members, etc. Thanks to the fact that SPACE is represented with over 80 partners in 28 countries with many partners in the new EU countries - there is a large platform for choosing partners in developing projects that start at the Annual Meetings.
